For larger sizes or any size not shown on chart, please call sales office.

Prices are based on orders of four or more columns.

Orders with less than four are subject to a set-up charge.

Solid board redwood columns - please call sales office for prices.

Prices subject to change without notice.

PREMIER CUSTOM COLLECTION • WOOD

DESIGN OPTIONS

Contemporary and Art Deco

Our Contemporary and Art Deco columns are simple yet beautiful. The harmonious transition from the mirror-image capital and base molding to the column's plain shaft further enhances their matchless beauty and superb styling. You can choose either tapered or non-tapered columns for either interior or exterior applications.

Belley

Our new Belley shaped column has a Tuscan capital and base. The column diameter is the same at the top as it is at the bottom, but notice the gracious bell curve in the middle. For interior or exterior use, our Belley shaped column can be painted or stained, as you choose. Load-bearing, the column is available in a variety of diameters and heights. Please call for prices.

Arlington

The massive five-foot diameter columns which adorn the Arlington House, now part of Arlington National Cemetery, were the inspiration for our Arlington column. In the early 1800's, Arlington House was built by the step-grandson of George Washington and was later the home of Robert E. Lee and his wife, Mary Custis.

Rope Twist

Our custom Rope Twist column is pictured with an Ionic (Attic) base and Roman Doric capital. Custom fabricated in your choice of wood species. Please call with your sizes and wood choice for prices. The maximum diameter is 12" and the maximum height is 10'.

SPECIAL DESIGNS AND CUSTOM ORDERS

Column Styles - We can produce columns from architects' drawings, replicate columns on an existing structure and fabricate columns for historic restoration. Chadsworth offers many column options to meet your needs. Please speak with one of our sales consultants about any custom questions that you have.

Entasis - We can adjust our column entasis (or taper) to meet any architectural design. Please call a sales consultant with your requirements.

Fluting - The length and placement of the fluting can be altered to achieve many design styles. Fluting may be either the top or bottom one-third, one-half or two-thirds of the column shaft.

OCTAGONAL AND ROUND PLINTHS

In addition to our square wooden plinths, you may choose either an octagonal or round wooden plinth to achieve a unique style with your round columns. Please call for prices.
