Chadsworth's 1.800.COLUMNS Are Featured in *HOME Magazine's* Ultimate Insiders Guide

FOR IMMEDIATE RELEASE

CONTACT: Barbara P. Hedding (910) 763-7600 or barbara@columns.com

Chadsworth's 1.800.COLUMNS are featured in the February Issue of HOME Magazine. *The Ultimate Insiders Guide to Unique and Hard to Find Home Goods and Services* is an annual list of sometimes off-the-beaten-path but *always-outstanding* home-related products and shops.

Listed under Alternative Building Materials, Chadsworth's 1.800.COLUMNS PolyStone™ Columns topped the list. 'By merging classical styling with modern materials like lightweight spun-fiberglass and low-maintenance PVC, Chadsworth has produced a collection of stock and custom columns that will withstand the test of time.

Chadsworth's PolyStone™ columns are made of reinforced polyester resin, fiberglass and marble dust, and feature an architectural taper and a classical bead. The Tuscan capitals and bases are made from the same material as the shafts.

No stranger to the readers of *HOME*, Chadsworth's 1.800.COLUMNS PolyStone™ Column was the recipient of *HOME Magazine's* 2001 American Building Products Award. "The PolyStone™ Composite Column was chosen because its design so clearly responds to the demands for form and function required by today's lifestyles", said then Editor Gale Steves, "The PolyStone™ Column is a classic idea with a twist".

"Architects, builders, designers, *and* homeowners tell us that our PolyStone™ Column is an excellent product, and is the only choice when extra strength and durability are needed on the job, and we're glad that *Home Magazine* agreed," says Jeffrey L. Davis, the Founder and Principal Designer of Chadsworth's 1.800.COLUMNS.
