

# CHADSWORTH'S 1.800.COLUMNS

## *P.R REPORTS*

### FACT SHEET

- COMPANY** Chadsworth's 1.800.COLUMNS is a privately held mail order company that designs, manufactures and distributes quality columns, decorative capitals, pillars, pilasters and posts for worldwide delivery. Columns can be produced in wood, PolyStone™ and fiberglass.
- CHAIRMAN** **Jeffrey L. Davis**  
Born: April 30, 1961  
Education: Institute for the Study of Classical Architecture, New York, 1993; St. Andrews Presbyterian College, North Carolina, 1982.
- PRODUCTS** **Authentic Replication Wooden Columns** are the most architecturally correct and authentically detailed columns offered. These beautiful columns feature the 1/3 – 2/3 taper (entasis) and a classic bead (astragal). Every Authentic Replication column is created from a computer-generated template to replicate historic proportions. Over 400 antique designs are available with computer-controlled lathes to proportion and create a perfect wood column.
- Contemporary Custom Wooden Columns** include many custom and original designs by Mr. Davis. Exclusive to Chadsworth Columns are: Art Deco, Contemporary and the Arlington.
- Classic and Colonial Wooden Stock Columns** round out Chadsworth's line of wooden columns. Both styles are offered in a variety of sizes with a plain or fluted shaft coupled with a Tuscan capital and Roman Doric base. The Classic features a 1/3 – 2/3 taper and a classic singular bead (astragal) while the Standard Stock columns employ a continuous taper and a double bead. Columns may be hand sanded and primed, if customer requests. A large selection of decorative capitals is available.
- PolyStone™** is the brand name of Chadsworth's polyester resin fiberglass column. Unlike wood, PolyStone™ products are not affected by moisture or insects and are virtually equal in price and load-bearing capacity. PolyStone™ columns are available with decorative capitals and plain and fluted shafts and have a lifetime guarantee.
